
CARBON NEUTRALITY AND NET ZERO DECLARATION

META University recognizes the global challenge of climate change and the need for collective action to reduce greenhouse gas emissions.

In alignment with the national strategy of the Republic of Kazakhstan and international sustainability frameworks, META University hereby declares its commitment to supporting the transition towards a low-carbon and sustainable future.

Commitment

META University commits to achieving **carbon neutrality and Net Zero greenhouse gas emissions by 2050** through a phased and responsible approach.

Strategic Directions

To achieve this goal, the University will:

- progressively reduce its carbon footprint across campus operations
- improve energy efficiency and promote sustainable resource use
- support the integration of renewable and low-carbon energy solutions
- incorporate Environmental, Social, and Governance (ESG) principles into institutional policies and practices
- encourage research, education, and innovation in sustainability and climate-related fields
- engage students, staff, and partners in sustainability initiatives

Implementation Approach

META University will adopt a step-by-step approach, including:

- assessment and monitoring of carbon emissions
- development of internal sustainability policies and initiatives
- gradual implementation of energy-saving and environmentally responsible practices
- collaboration with national and international partners

Institutional Responsibility

META University acknowledges its responsibility as an academic institution to contribute to sustainable development and to promote environmental awareness within society.

The University will strive to integrate sustainability into its governance, education, research, and operational activities.

Final Statement

Through this Declaration, META University confirms its intention to move towards carbon neutrality by 2050, contributing to Kazakhstan's long-term climate goals and global sustainability efforts.
